1. Claims 7, 8, and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/2/04.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, and 6-8 of U.S. Patent No. 6,609,719. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the features presently claimed are recited in the claims of the prior patent.

4. Claim 1 is objected to because of the following informalities: In claims 1, line 4, "consisting of" should be –comprising–. Appropriate correction is required.

5. Applicant's arguments filed 2/15/05 have been fully considered but they are not persuasive.

Applicant indicates that the claims have been amended to distinguish from embodiments claimed in USPN 6,609,719. The examiner disagrees. Applicant is

currently claiming the embodiment of Figure 2, including a primary wheel formed by two planar members and an even number of secondary wheels mounted on stub axles. The stub axles are angularly equally spaced apart and spaced a given distance from the center of primary wheel. Claim 1 of USPN 6,609,719 recites the primary and secondary wheels satisfying the functional elements of the present claims. Claim 3 of '719 recites two parallel spaced apart plates that support the axles and the axles extending inwardly from the plates (toward the opposite plate). Claim 6 of '719 also recites two parallel spaced-apart plates with inwardly directed stub axles on both plates. Claim 6 specifies that that the maximum thickness of the secondary wheels is less than half the spacing between the two plates (another way of saying the plates are spaced apart more than twice the width of each wheel, recited in claim 2 of the present application). Claim 10 of '719 indicates the distance between adjacent secondary wheels is less than the diameter of the secondary wheel, so it would have been obvious to a skilled artisan that adjacent wheels would be mounted on opposite plates. Claims 7 and 8 of '719 correspond to claims 4 and 5 of the present application. Therefore, every element of the present claims is believed to be described in the claims of the earlier patent '719.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
